PHẠM HOÀNG SƠN

25/04/2005

Fullstack Developer

Ho Chi Minh City, Vietnam | pson4282@gmail.com | LinkedIn | Github

CAREER SUMMARY:

4rd-year IT student with hands-on experience building scalable backend applications using NestJS, TypeScript, PostgreSQL, Redis, and Docker. Experienced in API development, database design, authentication, and VPS deployment. Seeking a Fullstack Developer Intern role to contribute to real-world products and further develop backend engineering skills.

PERSONAL PROJECTS:

TEAMZONEVN — Social Gaming Matchmaking Platform | *Jan 2026 – Present*

GitHub* / *SwaggerAPI* / *Dashboard* / *Landing Page (Download App)

Tech Stack: NestJS, TypeScript, PostgreSQL, Prisma ORM, Redis, Socket.IO, Supabase Storage, Docker, Nginx, GitHub Actions (CI/CD), React Native, ReactJS.

- Designed and implemented a **PostgreSQL** schema with 25 Prisma models and 17 enums; improved query performance through relational modeling and composite indexes.
- Implemented **JWT authentication**, **Google OAuth 2.0** authentication, **refresh-token** rotation, bcrypt password hashing, and **role-based** authorization.
- Built **Redis-backed** distributed **rate limiting** and **real-time** leaderboard features.
- Developed **room-based chat**, authenticated **WebSocket** connections, and real-time in-app notifications using **Socket.IO**.
- Built **React Native** mobile and **React** web interfaces for zone discovery, join requests, team management, group chat, and notifications.
- **Deployed** and maintained backend services on a **Linux VPS** using **Docker**, **Nginx** reverse proxy, **Supabase Storage**, and **GitHub Actions CI/CD**.

UTH CLUBS & EVENTS — Club & Event Management System | *Jul 2025 – Dec 2025*

GitHub* / *SwaggerAPI* / *Website

Tech Stack: NestJS, PostgreSQL, TypeORM, Supabase Storage, ReactJS, Tailwind CSS, Docker, Nginx, Linux VPS.

- Developed **RESTful APIs** using **NestJS** and **PostgreSQL**.
- Implemented **Role-Based Access Control (RBAC)** for three user roles using custom **NestJS guards**.
- Integrated **email notifications**, **cloud storage**, and **image upload** functionality.
- Built **QR Code–based event check-in** and automated participation point distribution.
- **Deployed** and maintained the application using **Docker**, **Nginx**, and **VPS infrastructure**.
- Developed responsive frontend interfaces using **React** and **Tailwind CSS**.

EDUCATION & LANGUAGE:

University of Transport and Communications (UTH)
Information Technology | 2023 – Present
English: Intermediate (Recent internal test: 6.0 IELTS) — Proficient in reading & writing technical documentation.

SKILLS:

- **Backend**: NestJS, Node.js, TypeScript, JavaScript, REST APIs
- **Databases & Caching**: PostgreSQL, MySQL, Redis, Prisma ORM, TypeORM, Supabase
- **DevOps & Tools**: Docker, Docker Compose, Nginx, GitHub Actions (CI/CD), Linux/VPS, Postman, Swagger
- **Frontend**: ReactJS, React Native, Tailwind CSS
